

Logical and results-driven Web Developer dedicated to building and optimizing user-focused websites for customers with various business objectives. Hard working and creative when crafting effective websites, apps and platforms to propel competitive advantage and revenue growth. Technically proficient and analytical problem solver with calm and focused demeanor.

Education

2018-08 - 2020-08	Information Technology, T.S.U. en Tecnologías de la Información <i>Universidad Tecnologica de Durango, Durango</i>
2020-08 - present	Information Technology, Ingeniería en Desarrollo y Gestión de Software <i>Universidad Tecnologica de Durango, Durango</i>

Notable Projects

2020-05 - 2020-08	Lead Developer <i>Sirre Admin</i> https://sirre-dashboard.herokuapp.com/ This project was created for a consulting company named Sirre during an internship in which we developed a CRUD application that replaced their employee and customer management system as well as provided additional features such as Google Login, in addition to an appointments and notes section. This application was developed using Node.js, Express, and MongoDB in the backend and as for the frontend we used Bootstrap and Handlebars as a logic-less templating engine to dynamically render HTML pages.
2021-05 - 2021-08	Lead Developer <i>Metro Consulting</i> https://proyecto-final-9c.herokuapp.com/ This web application was created as a school project in which we created a feature-rich Admin Dashboard for a fictional consulting company. This project was created using React.js, and Bootstrap in the frontend, and making use of Node.js and MongoDB within a Rest API in the backend. This project contained an extensive set of notable features such as Google and Facebook login, different user privileges, cookies, protected routes, password recovery via email, and a dedicated chat section.
2021-06 - 2021-09	Lead Developer <i>Arc Development</i> https://utd-arc-development.netlify.app/ This was a personal project in which I developed a website with a professional design using newer technologies such as React.js and Material-UI. This project contains a responsive and user-friendly design as well as very efficient and easily maintainable code. Additional features include the use of a functional contact us page, a custom questionnaire for the purpose of obtaining a free estimate of my web development services, and finally a project management site in which I can oversee the estimates that have been requested.
